DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. wherein the curing agent is a uretdione product. (claims 2, 6, 9 and 12)
- b. wherein the curing agent is a blocked polyisocyanate product. (claims 3, 4, 7, 10 and 13)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1713

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Anne Sabourin on 11/14/05, a provisional election was made with traverse to prosecute the invention of species a), claims 1, 2, 5, 6, 8, 9, 11 and 12. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3, 4, 7, 10 and 13 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 5, 6, 8, 9, 11 and 12 are rejected under 35 U.S.C. 102(b), as being anticipated by Das et al. (USPN 6,462,139), Mikolajetz (WO 02/64652) and Bendix et al. (WO 01/42310 and WO 01/58963).

Each of Das et al. (abstract), Mikolajetz (see claim 11 of English translation, US2004/0048968) and Bendix et al. ['310 (see abstract of English translation, USPN 6884839) and '963 (see claim 14 of English translation, USPN 6797761)] individually teach preparing aqueous coating compositions wherein solid curing agents are dissolving in polymerizable ethylenically unsaturated monomers and the monomers are emulsion polymerized to form a polymer having groups reactive with the curing agent.

Thus, the requirements for rejection under 35 U.S.C. 102(b) are met.
